

- The name of the website - HeartLog
- The description of the topic:
 - This is your personal cozy little space where your thoughts can be let out. You can write notes every day. You can label it based on which topic. Or let it all be one, but its purpose is to be a little pocket notebook to keep track of your thoughts. Reflection of your feelings, a tiny piece of your heart is preserved to keep your memories intact. You can include secrets, your accomplishments, drama, gossip, etc. Think of it as a place where every heartbeat becomes a story.
- A list of each of the page names (Note: About Us would be a page, but login would not (That's more like a pop-up feature)).
 - Out of the 5 unique pages, one of them includes Home/dashboard, two are about us, three is the journal page, four is resources or tips, and five is the doodling station to just let out frustration with a touch of art.
- A description of the data you will be storing, manipulating, and viewing. Go Into details, e.g. we will be storing a list of tools (Tool name, description, price, producer, ...). Only the administrator will be able to add/edit/delete, so we will need user accounts with login security.
 - The user will be able to add, edit, and delete their own entries. There will be an option to view a timeline of past entries and search them by date. Including their time stamp of when the entry was written, with the short title and a boat tag. Each week is user will have to have their own secure account containing a username and a password. These entries are strictly private by default.
